

Ascent Corporation designs, installs and maintains information technology, mechanical, electrical, fire-life-and-safety and other systems critical to our clients' daily operations. We are headquartered in St. Louis, Missouri. Since our formation in 1998, we have managed more than \$950 million in large-scale projects and have been involved in the round-the-clock operation of more than three million square feet of mission critical facilities in North America and Great Britain. Our business is growing fast and we are currently seeking a Maintenance Engineer.

TITLE: Maintenance Engineer

PURPOSE:

To performing troubleshooting, diagnostics and effecting general repairs to various facility systems, as well as grounds and maintenance equipment.

RESPONSIBILITIES:

- Coordinate all preventive, corrective and emergency maintenance activities, including those activities performed by Ascent, Client or Vendor staff.
- Manage Ascent, Client and Vendor staff in the maintenance of buildings and grounds.
- Inspect buildings, space, grounds and/or equipment regularly for problematic or unsafe conditions.
- Perform and oversee general and preventative maintenance tasks to include: Equipment checks, equipment performance monitoring, cleaning, lubrication and service of a wide variety of components/devices.
- Perform initial troubleshooting and/or repairs to mechanical and infrastructural systems, including: Electrical systems, HVAC systems, plumbing systems, life safety systems, security systems, roofs, drains, shop equipment, A/V systems, emergency power systems, and systems furniture.
- Manage facility renovations, upgrades, and build-outs including overseeing vendors.
- Implement and manage projects as required and associated items such as costs for any projects for Ascent or Ascent Clients.
- Manage and maintain site Building Management Systems, CCTV, Access Control System and Maximo.
- Support Critical Systems Engineer/Building Owner on overall operation of the data center facility.
- 24 X 7 maintenance staffing of Data Center Facility with rotational on-call.

QUALIFICATIONS:

- All qualified candidates should submit their resume to humanresources@ascentcorp.com
- Potential candidate must be able to work 2nd shift operation
- High School Diploma or GED equivalent
- 5+ years related work experience in a maintenance environment
- Technical, vocational or on-the-job training in the following areas: HVAC, electrical, mechanical, process controls, painting, plumbing, carpentry and engine repair.
- Maintenance experience in 24x7 and/or critical support environment a plus
- Professional appearance, good communication and organizational skills are required
- Proficiency with basic operations of a computer; knowledge of MS Excel, MS Word, MS Project and Auto Cad is a plus
- Possess competent knowledge of use and care of tools and equipment used in facilities and/or grounds maintenance.
- Possess competent knowledge of building codes and safety regulations
